

“Ya Gotta Have FAITH!”

So what do successful people do that allows them to persevere when they are struggling to achieve their goals. What do they do when everything seems to indicate that they will never realise their dreams?

They apply the technique of FAITH.

F – Focus - They know where they are going. They have a clear-cut goal toward which they are moving and they are willing to take whatever steps are required which will bring them closer to achieving it.

A – Attitude – They have a positive attitude. Their current circumstances look pretty dismal, but they don't allow this state of affairs to get them down. They concentrate on positive aspects of their situation because they know that where they are is leading them to where they want to go.

I – Intention – They intend to reach their goals. They don't hope or wish they will achieve them, they intend to achieve them. They recognize that they have control over their destinies and they will do whatever it takes to finally achieve success.

T – Trust – They trust that they have the ability to make their dreams a reality. They know there is something inside of them that has the talent, skills, and courage to realize their dreams and they depend on this inner strength to help them persevere.

H – Hold (the vision) – They hold the vision of their dream. They see themselves achieving the success that they want. They play this picture over and over in their minds, and they know that one day, it will be their reality.

When you hear about successful people, realise that they are often no different than you or me. The reason they have achieved such great success is because they have **FAITH**. You can also use the technique of **FAITH** as you move forward in your life. You have what it takes to be successful; you just need to have **FAITH**.
